

Construction Update September 23, 2021

The Idaho Transportation Department (ITD) is placing the final layer of pavement on Idaho 55 between Donnelly and McCall.

Driveways and roads entering Idaho 55 between Donnelly and Lake Fork will be adjusted over the next week. ITD will make sure driveways and approaches match what existed before construction.

If your driveway or road is repaved where it enters the highway, expect to wait 30 minutes to an hour before driving over the new pavement.

Safety is ITD's #1 priority

- **No passing** in the project area regardless of road markings
- Traffic **must stop and wait** for the pilot car in the work zone
- **Do not** turn around when waiting for the pilot car
- Expect an uneven road surface, and bumps when entering or exiting ID-55

Idaho 55 Smiths Ferry Project Update

Expect:

- Full road closures Monday-Thursday from 10 am to 2 pm
- One-way alternating traffic outside those hours.
